The Challenge

Hilton Zürich Airport was looking to optimise its cash management processes. Since 80% of payments are made by credit card, the cost of handling cash had become too large for the hotel.

The Solution

The Gunnebo SafeRecycling RS6_CR5 has streamlined cash handling and simplified processes for staff. Cash is now recycled and thanks to the optimisation of CIT pick-up routines, costs have been reduced.

The introduction of the SafeRecycler has also removed the need for a full-time cash handling position, which was crucial to securing a strong return on investment. Through automated processes, the expenses related to cash handling have been reduced to a minimum.

One important aspect of the Gunnebo solution has been the service – which in this case has led to a high level of customer satisfaction. For this type of recycling unit, a dedicated technician is automatically assigned to installation for one week. In this way, any issues or questions can be dealt with on the spot, allowing the customer to get to know the machine and overcome any teething problems.

Customer Benefits

- Excellent service (availability and response time)
- Reliability of the recycling unit
- Simple and quick to use
- Elimination of one full-time position
- Staff security
- Simplification of processes
- Skimming of cash levels
- Optimisation of cash management and reduction of costs
- Optimisation of CIT pick-up routines leading to cost savings
